📍 São Paulo, Brazil

*With 6+ years of experience in business analysis and digital delivery, I specialize in translating complex requirements into clear, actionable plans. Currently working as a Project Manager and Product Owner, I **lead cross-functional teams**, **drive agile processes**, and **shape product strategy and design**. I bridge business goals and technical execution to deliver impactful, user-centered digital solutions.*

Experience

Sept 2024 – Present
Scrumlaunch LTD, (São Paulo, Brazil)
IT Project Manager & Product Owner (Remote)
- Led end-to-end delivery of digital products with cross-functional teams (developers, designers, analysts)
- Facilitated Agile ceremonies: demos, daily stand-ups, sprint planning, retrospectives
- Managed project scope, timelines, risks, and ensured alignment with business goals
- Oversaw backlog grooming, roadmap planning, and feature prioritization
- Maintained strong client relationships and translated business needs into actionable tasks
- Continuously optimized delivery processes to improve efficiency and output quality
- Ensured delivery of high-quality, on-time solutions that met or exceeded expectations

2020 – 2024
Syncier Consulting GmbH, (Vienna, Austria)
Business Analyst & Product Owner
- Led Agile projects from scoping to delivery, aligning business and tech teams through clear documentation and regular communication
- Translated stakeholder requirements into functional and technical solutions, managing backlog and priorities
- Conducted end-to-end testing and ensured quality through structured QA processes and risk mitigation
- Designed and tested RESTful APIs using Postman; performed complex SQL queries for database management
- Analyzed logs via Kibana and Kafka (KPow) to troubleshoot and optimize backend systems
- Created training materials and onboarded new team members on ABS backend and API development

2018 – 2020
CheckMyPlace GmbH (Vienna, Austria)
Web Developer
- Designed and developed responsive web applications using PHP, JavaScript, and jQuery Mobile
- Managed MySQL databases, ensuring data integrity and performance
- Created and customized websites with WordPress and other CMS platforms
- Handled UI/UX design and front-end implementation to improve user engagement
- Built a solid foundation in both front-end and back-end development, supporting a smooth transition into Business Analysis

Education
